DOI:10.16016/j.1000-5404.1985.02.014

in the normal range. No overt changes in the blood picture except a slight elevation of white count were found at the beginning of the infusion. Transient changes were observed in the function of platelets and the coagulofibrinolytic and immune systems.

These results suggest that the infusion of No. 2 fluorocarbon blood substitute is rather safe and the possibility of its clinical application is great but further investigation is essential to find out measures to prevent and treat the anaphylactoid reactions of this fluorocarbon emulsion observed in our study.

著名生理学家张香桐教授等来渝讲学

由重庆市生理科学会和第三军医大学联合主办的1985年重庆生理学术报告会，已于6月3日至6日在第三军医大学举行。

应邀前来讲学的有著名生理学家张香桐、卢振东、陈孟勤、周衍椒等18位专家教授，报告了专题学术论文20多篇，既有神经、循环、消化等系统新的研究成果，也有对某些生理机制的探讨，以及对实验方法改进的经验体会等。

来自84所院校的生理学及横向学科工作者240多人听取了报告。
